Information[Contact Us](#)**How to Permanently Decrease Your Waste by 10%?****How to Save Time on Sheet Layout?**

XY Soft™ is an CAD/CAM cutting optimization software company, special development and supply of Software Solutions to optimize 1D,2D,3D : problems in sheet metal, glass, woodworking, fabrication, PCB and other same time, we offer custom offshore software development services. Our products raise your productivity and professional level of service with optimization technology!

**Sheet Cutting Suite**

2D Nesting software to optimize sheet layout.

Sheet cutting suite is a top-rated panel nesting utility and reducing scrap generated.

Sheet Layout Optimizer - Sheet Cutting Suite

- reduce waste time and money.
- support **EXCEL**, **AutoCAD** and **CNC** cutting machine.
- free to trial

Sheet Cutting Suite is a **nesting** software for generating optimized **layouts** and reducing **scrap** generated by 2 Dimensional Rectangular cutting (Guillotine cutting or nested) processes. It finds application in varied industries such as Glass cutting, Sheet Metal layout and fabrication, Wood working, Building panel, Carpet, PCB, acrylics etc. Whether your stock is in the form of Sheets or Coils (rolls), once you define your cutting job, the layout software requires just one mouse click to arrange the parts on appropriate stocks which requires minimum skill and effort from the operator for generating the **optimized layouts**.

It helps in cutting down wastage in Material, Time, Labor and Process.

NEW! Sheet Cutting Suite 4.7.9.2 (2005-1-13) opt2dc.zip (5.1

Welcome

Welcome to [Striker Systems](#), world leader in the development of nesting and CAD/CAM software solutions.

For over 20 years, Striker Systems has been assisting sheet metal manufacturers in the production of parts... accurately, on time, and at the lowest cost. We invite you to explore our web site to learn more about our company, products, and services. Please sign up for a free product demonstration CD, or feel free to give us a call and consult with a team member about the specific needs of your organization.

Explore Our Products

[Sheet Metal Nesting](#) – Striker Systems offers a complete line of nesting solutions to accommodate production environments, jobs of all sizes, and everything in between. Striker's nesting capability extends from full automation to adapt to specific manufacturing requirements.

[Sheet Metal CAD/CAM](#) – Striker Systems offers programming for punching, cutting, combination, and shearing machine tools. The FMS, Production Cell, and Part Sorting System support.

[Stamping Die Design](#) – Striker Systems offers DIE Professional, AutoCAD based products to assist in the design of complex stamping dies. Available features include flat part creation, form section development, progressive strip layout, die design, and CNC wire EDM programming.

[DNC Communications](#) – Consult with the experts at Striker Systems to develop a DNC communications plan for your manufacturing organization. Whether you have one CNC machine or many, Striker Systems has a system from basic send/read to automated demand pull.

Solid Modeling Interfaces

Striker Systems nesting and CAD/CAM solutions include a complete CAD interface providing advanced sheet metal design capability.

News

DNC2go

March 6, 2006

Striker Systems is pleased to announce the release of it's new PocketPC DNC Communications application. DNC2go provides all of the functionality you would expect from a premier communications application and adds the freedom of using your PocketPC device to send and receive NC code...

PARTshare

January 20, 2005

Striker's Partshare for Solidworks and Inventor provides seamless data sharing between engineering and manufacturing functions...

this satisfies the design requirements for many of our customers realize that the industry has rapidly embraced parametric solid r systems such as Autodesk Inventor, SolidWorks, and SolidEdge needs of our customers, we have expanded our development pi include interfaces to these popular design solutions.
